RA-ESG
SOLAR SOLUTIONS

CORPORATE OVERVIEW
2026

WHAT WE DO

RA-ESG develops utility-scale solar infrastructure and delivers projects end-to-end, from origination through to sale.

WHO WE ARE

A global renewable energy group building large-scale solar, the kind of infrastructure typically reserved for major institutional funds.

HOW IT WORKS

The RA-Group partners with land and project owners from inception, managing feasibility studies, electrical, civil and grid-connection reports, government permits and offtake contracts. It then raises the capital to fund EPC (engineering, procurement and construction), and each project is either sold or retained.

OUR PARTNERS

Joint ventures with SANY Silicon Energy (SANY Group), JA Solar, RedSolar and Sahaj Solar.

GLOBAL RENEWABLE ENERGY INFRASTRUCTURE

Building the Future of Renewable Energy

RA-ESG PLC develops and delivers large-scale solar projects across global markets, opening access to institutional-grade renewable infrastructure for a wider base of investors.

Utility-scale	Global	Lifecycle	4 JVs
Solar infrastructure	Renewable energy group	Origination to sale	Tier-1 partners

WHAT WE DO

01 Project Development
Origination of utility-scale solar from concept through to grid-ready infrastructure.

02 Long-Term Revenue
Electricity sold to governments and industrial users under long-term power purchase agreements.

03 Multiple Exit Routes
Projects sold to institutional investors or retained for ongoing energy income.

FOUR VALUE-CREATION ROUTES

- The Platform
- Project Sales
- EPC Construction Profits
- Long-Term Energy Income

STRATEGIC PARTNERS

SANY Silicon Energy, JA Solar, RedSolar and Sahaj Solar: funding, Tier-1 equipment, world-class EPC delivery and a built-in acquisition route.

"Renewable energy is now the most competitive pathway to decarbonising the global energy system."

Paraphrasing the Director-General, International Renewable Energy Agency
